4) Search for your items and select one item from the results page.

5) Click the “Export Options” button, above the “Star”.

6) From the three options, choose which option sounds good to you. Your options are: email the record of the item, cite the record, or create a hyperlink to be inserted into a webpage or email.
If you cite the record, you have the options of APA, MLA, or Chicago (Author-Date). Always compare the citation with the format in the actual style guide or manual.
